Nienna Labs
&
Aider Ventures
Internship Program

Are you excited about the future of AI and motivated to contribute to its advancements?

At Nienna Labs, in partnership with Aider Ventures, we invite you to join a dynamic journey at the forefront of AI-driven innovation. Our programs are designed to not just keep you up to speed with the latest advancements but to empower you to lead and innovate within your field. Whether you're interested in transforming design thinking and strategy with AI, enhancing marketing analytics, pioneering business innovation, or diving deep into specialized areas like equity research, macroeconomic analysis, cybersecurity, or time series analysis, our team of experts is here to mentor and guide you. Together, we'll unlock the immense potential of AI to revolutionize industries and drive sustainable growth. Partner with us, and let's shape a future where your skills and knowledge in AI become the driving force behind tomorrow's innovations.

Internship and Fellowship Program Overview

The Nienna Labs and Aider Ventures internship and fellowship program is your gateway to hands-on learning and professional growth. Our programs provide a unique opportunity to immerse yourself in AI projects that matter—from design thinking and strategy to advanced time series analysis. You'll work alongside industry leaders, receive personalized mentorship, and contribute to projects that have real-world impact. Whether you're looking for a summer internship to kickstart your journey or a two-year fellowship to dive deep into AI, this program is designed to help you build the skills and expertise needed to thrive in the AI industry.

Internship and Fellowship Opportunities

Our program offers a variety of flexible, student-centred opportunities:

1. **Summer / Part-Time Internship:**
   - **Duration:** 3 months
   - **Focus:** Introductory projects in AI applications and strategy.
   - **Ideal for:** Students looking to gain initial exposure to AI.
2. **Half-Yearly Internship:**
   - **Duration:** 6 months
   - **Focus:** Advanced research and practical application in AI-driven marketing, equity research, and cybersecurity.
   - **Ideal for:** Students seeking deeper engagement and understanding.
3. **Yearly Fellowship:**
   - **Duration:** 1 year
   - **Focus:** Comprehensive AI research projects, real-world problem-solving, and strategic business innovation.
   - **Ideal for:** Advanced students and early-career researchers.
4. **Two-Yearly Fellowship:**
   - **Duration:** 2 years
   - **Focus:** Extensive research, development, and implementation of AI in specialized areas such as macroeconomic analysis and time series analysis, with opportunities for publication and industry collaboration.
   - **Ideal for:** Researchers and professionals aiming to make significant contributions to AI and its applications.

Program Benefits for Students and Researchers

Participants in our program will gain:

1. **Real-World Application of Research:**
   - Engage in case studies and capstone projects that directly apply AI research to address real-world challenges.
2. **Placement Coaching:**
   - Receive expert guidance and coaching to prepare for placement opportunities in leading AI-driven organizations.
3. **Entrepreneurship Idea Validation:**
   - Collaborate with experienced mentors to validate and refine your entrepreneurial ideas, with potential incubation and investment opportunities through our network.
